

WAX MELTS nature's air purifier

Scientists have proven that anything floating in the air, does so because it is 'positively charged'. Beeswax, when burned, emits negative ions which bind with the positive ions, creating a complete molecule, which is heavier than air and thus falls to the ground. Therefore beeswax melts are a better alternative for your oil burner, than using neat oils and water.

INGREDIENTS

- Yellow Beeswax – 75g/2.65oz
- Essential oil blend – 7.5ml OR 300 drops

Use your favourite neat blend of essential oils. This makes it easier to make each batch. Go the [Scent Skin Spa site](#) for blend ideas

APPARATUS

- Silicone Chocolate Molds
- Double boiler/bain-marie
- Scales
- Bamboo skewer
- Small Glass jug for pouring

HOW TO USE

Simply pop a solid wax melt into the top of an oil burner, similar to the one opposite. Light a tealight candle and leave to burn.

The beauty of using wax instead of traditional water and oils, is the wax won't evaporate, so it lasts much longer and there is less chance of burning the oils. You can reuse it 4 times or until the aroma has faded.

To remove - pop it in the freezer for a few minutes and ease out the wax with a knife.

METHOD

1. Add the beeswax to a bain-marie and put on a medium heat until fully melted (don't let the pot of water underneath boil dry).
2. **DO NOT** be tempted to add other oils to the wax, such as coconut oil, this will negate the purifying performance and final aroma.
3. Once fully melted add the essential oil blend to it.
4. Give the mixture a stir with a bamboo skewer.
5. Pour the mixture into the glass jug.
6. Carefully pour the mixture into the silicone molds.
7. Either place the molds in the fridge for 1 hour to solidify or leave them on the counter, **they will solidify very quickly** due to the high wax content.
8. Store in small airtight bags until use, this keeps the aroma locked in.
9. You can also use the melts as a **lingerie drawer fragrance** by popping a couple in an organza bag and leaving in the drawer to **scent your smalls!**

USES

- Room deodorizer
- Air purifier
- Room Fragrance
- Lingerie drawer scent
- Allergy Buster!
